

MCP/API Access Terms & Conditions

October 2026

MCP/API Access Terms

These Amana MCP/API Access Terms & Conditions (the **"MCP/API Access Terms"**) form part of the Client Agreement between AFS Global Ltd (the "**Company**" or **"AFSG"**) and the Client.

1. Definitions

1.1 In these MCP/API Access Terms:

"External Application" means any application, platform, system, service, script, bot, software or other tool not operated, controlled or provided by the Company which a Client chooses to connect through MCP/API Access.

"External AI Application" means an External Application which uses artificial intelligence, a large language model, machine learning, automated reasoning, an AI agent, chatbot or similar technology.

"MCP/API Access" means the technical connection, including a Model Context Protocol connection, application programming interface or other technical interface, made available by the Company through which a Client may authorise an External Application to access specified Client Account information, obtain information made available by the Company, or submit Instructions or Orders to the Company.

1.2 Capitalised terms not defined in these MCP/API Access Terms shall have the meaning given to them in the Client Agreement, including without limitation "Agreement", "Client", "Client Account", "Company Online Trading System", "Instruction", "Order", "Services", "Transaction", "Website" and "Applicable Regulations".

2. Scope of MCP/API Service

2.1 MCP/API Access is a technical access channel made available by the Company. It allows the Client to authorise an External Application selected by the Client to interact with specified Company systems and Services. Via MCP/API Access, the External Application can retrieve specified information relating to the Client Account (including balances, positions, prices), receive general information in relation to Financial Instruments and the Company's Services, and submit Instructions or Orders to the Company. The Company provides technical connection only between its systems and an External Application.

2.2 The Company may from time to time amend, suspend, restrict, withdraw or impose conditions on the availability, functionality or use of the MCP/API Access, in whole or in part, where this is reasonably required for legal, regulatory, operational, security or risk management reasons, or otherwise in accordance with the Agreement.

2.3 MCP/API Access is made available only to Clients who already maintain an active Client Account with the Company and who complete any activation, authentication and consent steps required by the Company from time to time.

2.4 The Client's obligations, including without limitation, paragraph 16 (Personal data, confidentiality, recording of telephone calls and records) of the Client Agreement, in relation to use of the Company Online Trading System shall apply equally to the Client's use of the MCP/API Access.

2.5 An External Application, including an External AI Application, may use artificial intelligence, machine learning, large language models or similar technologies in connection with MCP/API Access. The risks associated with use of an External Application are set out in Section 5.

2.6 The Company may, at its discretion, impose limits on the number, size, frequency or type of Instructions or Orders that may be submitted through the MCP/API Access in any given period, and may require additional authentication or confirmation steps before accepting an Instruction or Order submitted through the MCP/API Access. The Client will be notified of any applicable limits through the Company Online Trading System or MCP/API Access.

2.7 Notwithstanding the definition of Abusive Trading/Market Abuse in the Agreement, the Client's use of MCP/API Access through an External Application authorised by the Client in accordance with these MCP/API Access Terms shall not, by itself, constitute unauthorised use of an automated data-entry system, artificial-intelligence software or other automated tool. This carve-out applies only to the use of MCP/API Access in accordance with these MCP/API Terms. It does not apply to market abuse, manipulation, unauthorised access, circumvention of controls, exploitation of errors, excessive or disruptive use, or any other conduct prohibited under the Agreement or Applicable Regulations.

3. No Advice

3.1 The Client acknowledges and agrees that the Company does not provide investment advice, personal recommendations, portfolio management, legal advice, tax advice or any other form of advice via the MCP/API Access service.

3.2 The Client shall not treat MCP/API Access, or any information obtained through an External Application, as a substitute for independent judgment or professional advice. The Client alone shall be responsible for making his/her own independent appraisal and investigation into the merits and risks of any Transaction, and for deciding whether any Instruction or Order is appropriate for the Client's objectives, financial situation and risk tolerance, weather he/she is using the MCP/API Access or not.

3.3 It is clarified that the Company does not operate, control, supervise, test, approve, endorse or recommend any External Application, including any External AI Application, model, agent, bot, algorithm, strategy, platform, software, output or decision. The availability of MCP/API Access, or the successful connection of an External Application, does not constitute a representation, approval,

endorsement, recommendation or warranty by the Company in relation to that External Application, its technology, model, data sources, strategy, output, actions, security, reliability or suitability.

3.4 For the avoidance of doubt, paragraphs 8 (Advice) and 9 (Market commentary) of the Client Agreement shall apply equally to any information made available through MCP/API Access.

3.5 Nothing in these MCP/API Terms shall be construed as the Client delegating discretionary trading authority to the Company. The Company does not act as discretionary portfolio manager or investment advisor in connection with the MCP/API Access.

4. Instructions and Orders

4.1 MCP/API Access may allow an External Application authorised by the Client to submit Instructions or Orders to the Company. The Client is responsible for ensuring that the External Application is properly configured and that all Instructions and Orders submitted through MCP/API Access are clear, accurate and complete.

4.2 The Client is solely responsible for selecting, assessing, configuring, monitoring and using any External Application connected through MCP/API Access.

4.3 An Instruction or Order received by the Company through MCP/API Access using the Client's valid authority, credentials, access token or connection may be treated by the Company as having been submitted by the Client. The Company is not required to obtain a separate confirmation from the Client before acting on such Instruction or Order.

4.4 The Company shall be entitled to require confirmation, clarification, repetition or re-entry of any Instruction or Order (but it shall not have an obligation to do so) and may refuse to act on any Instruction or Order which is ambiguous, incomplete, inconsistent, unlawful, operationally impracticable, outside applicable limits, or otherwise not acceptable under the Agreement or the Company's internal controls.

4.5 All provisions of the Agreement relating to pricing, execution, slippage, confirmations, record keeping and the Company's rights apply in full to Instructions and Orders submitted through the MCP/API Access. The Company may reject, delay, suspend or refuse to act on any Instruction or Order were permitted under the Agreement or where reasonably necessary for security, operational, legal, regulatory or risk-management reasons.

5. Risk Warning

5.1 The Client acknowledges that use of an External Application, including an External AI Application, involves additional operational, technology, market and communication risks, including without limitation: (a) the risk that outputs may be inaccurate, misleading, incomplete or outdated; (b) the risk that a prompt may be unclear or may be interpreted differently from what the Client intended; (c) the

risk of delays, outages or failures affecting the External Application, the MCP/API Access, or the connectivity between the Company Online Trading System and the External Application; and (d) the risk that market conditions may move between the time information is displayed and the time an Order is executed via the use of the MCP/API Access.

5.2 An External Application may be unavailable, interrupted, suspended, restricted, altered or discontinued at any time. The Company does not operate, control or supervise External Applications and does not guarantee their availability, functionality or performance.

5.3 The Client may use MCP/API Access as the sole means of monitoring the Client Account, Open Positions, Orders, Margin, Free Margin, Margin Level and market conditions, where such information is made available through the service. The Client shall remain solely responsible for monitoring the Client Account and all Transactions, including verifying the accuracy and completeness of the information received through MCP/API Access. The Company shall not be liable for any losses arising from the Client's failure to monitor its Account or Transactions, except to the extent such losses result from the Company's fraud, wilful misconduct or negligence.

5.4 All trading in CFDs and other leveraged products is high risk and may result in losses. The use of an External Application, including an External AI Application, does not reduce market risk, execution risk, Slippage, technology risk or any other risk disclosed in the Agreement, the Risk Disclosure and Important Factors, the Contract Specifications or any other notice made available by the Company.

5.5 In addition to the risks set out above, the Client specifically acknowledges the following risks arising from the use of an External AI Application: (a) the risk that the External AI Application may misinterpret a natural language instruction and generate or submit an Order that does not reflect the Client's actual intention; (b) the risk that the External AI Application may generate a response or proposed Order that appears reasonable but is based on incorrect, incomplete or outdated information; (c) the risk that instructions expressed in imprecise, ambiguous or colloquial language may be interpreted by the External AI Application in an unintended way; and (d) the risk that the External AI Application may not correctly process complex, conditional or multi-step instructions

5.6 The Client accepts all risks arising from the selection, configuration, use, operation, output, availability, security, failure or compromise of an External Application or External AI Application.

6. Third-party interface

6.1 MCP/API Access may allow the Company to transmit Client Account information, pricing information, Instructions, Orders and related technical information to an External Application at the Client’s direction and within the scope of authority granted by the Client.

6.2 The Company does not operate, control or supervise an External Application. The Company is not responsible for the manner in which an External Application processes, stores, uses, secures, transmits or deletes information once it has been transmitted to that External Application.

6.3 The Client shall protect all Access Data, credentials, access tokens and connection permissions used for MCP/API Access. The Client shall promptly revoke access and notify the Company if the Client knows or suspects unauthorised access, loss, disclosure, compromise, misuse or malfunction.

6.4 The Client shall not provide passwords, payment-card information, bank-account information, identity documents, one-time passcodes or other highly sensitive information to an External Application unless the Company specifically requests this through a secure and authorised process.

6.5 The Company may process and disclose personal data in connection with MCP/API Access in accordance with the Agreement, the Privacy Policy and Applicable Regulations.

7. Limitation of liability

7.1 Without prejudice to any other provision of the Agreement, the Company shall not be liable for any loss, claim, cost, damage or expense suffered by the Client arising directly or indirectly from:

7.1.1. the Client's use of an External Application, including an External AI Application, or reliance on any output made available through it;

7.1.2. any inaccuracy, incompleteness, ambiguity, inconsistency, delay or omission in any information, summary, explanation or other output generated through an External Application, including an External AI Application;

7.1.3. any interruption, unavailability, latency, suspension, restriction or failure affecting the MCP/API Access, an External Application, an External AI Application, or connectivity between an External Application and the Company's systems;

7.1.4. any misunderstanding, misinterpretation or erroneous submission of an Instruction or Order by the Client;

7.1.5. any act, omission, system failure, outage, privacy practice or security incident of an External Application, including an External AI Application, save to the extent that such liability cannot lawfully be excluded; or

7.2 Nothing in these MCP/API Access Terms shall exclude or restrict any liability of the Company arising from fraud, wilful default or gross negligence, or any liability which cannot be excluded or restricted under Applicable Regulations.

7.3 To the maximum extent permitted by Applicable Regulations, the Company's total aggregate liability to the Client arising out of or in connection with the MCP/API Access shall not exceed the aggregate fees or commissions paid by the Client to the Company in the three months preceding the event giving rise to the claim.

8. Suspension and termination

8.1 The Company may suspend, restrict, disable or terminate the Client's use of the MCP/API Access at any time where the Company reasonably considers this necessary for legal, regulatory, operational,

conduct, security, fraud prevention or risk management reasons, or where the Client is in breach of the Agreement or these MCP/API Access Terms. Where reasonably practicable and where the suspension is not urgently required for regulatory, security or fraud prevention reasons, the Company will endeavour to provide the Client with advance notice of any planned suspension of the MCP/API Access.

8.2 Any suspension, restriction or termination of the MCP/API Access shall not affect the validity of the Agreement, any Open Positions, pending Orders, completed Transactions or any liability or obligation of the Client under the Agreement. Any Instructions or Orders submitted through the MCP/API Access service which have not been confirmed, acknowledged or executed by the Company at the time of suspension, restriction or termination of the MCP/API Access shall be deemed not to have been received by the Company unless the Company expressly confirms otherwise. The Client is responsible for re-submitting any such Instructions or Orders through an alternative access channel available under the Agreement.

8.3 In the event that the Client does not receive an acknowledgment or confirmation of an Order and subsequently resubmits the same Order, resulting in duplicate execution, the Company shall not be liable for any resulting losses, costs, damages, or liabilities. The Client shall be solely responsible for verifying the status of the original Order prior to resubmission to prevent duplicate Orders.

9. Records and communications

9.1 The Company may record, retain and rely on records relating to MCP/API Access, including Client authorisations, connection and revocation events, access permissions, relevant application identifiers, API requests, Instructions, Orders, time stamps and execution records. The Company does not necessarily receive or retain the content of conversations, prompts, reasoning, strategies or other information within an External Application unless that information is transmitted to the Company through MCP/API Access.

9.2 Any communication, notice, confirmation or statement relating to the MCP/API Access may be provided by the Company through the methods permitted under the Agreement, including through the Company Online Trading System, e-mail, the Website or other electronic means.

10. General

10.1 These MCP/API Terms shall be read together with the Agreement, the Privacy Policy, the Risk Disclosure and Important Factors, the Contract Specifications, the Order Execution Policy and any other policy or notice made available by the Company from time to time.

10.2 In the event of any inconsistency or conflict between these MCP/API Access Terms and the Agreement, the Agreement shall prevail, save only that where these MCP/API Access Terms expressly impose additional obligations or restrictions specifically relating to the Client's use of the MCP/API Access that are not addressed in the Agreement, those additional provisions shall apply alongside the Agreement.

10.3 These MCP/API Access Terms shall be governed by the Laws of Malaysia, with disputes settled in the courts of Malaysia.
